**Letter of Recognition – Internship Completion**

09 February 2026

To Whom It May Concern,

This letter is to formally recognise Muhammad Anang Ayman Ramadhana (Ayman) for successfully completing his internship with Digital Agri Solutions Pty Ltd remotely from 17 Oct 2024 to 25 Sep 2025.

During his internship, Ayman made a strong technical contribution by designing and implementing an OpenID Connect (OIDC) authentication in our server environment. This work involved understanding our existing infrastructure, configuring the required authentication flows, and ensuring secure and reliable integration so that users and services could authenticate consistently.

Ayman approached the work with a thoughtful, structured mindset. He demonstrated strong problem-solving skills, and a clear understanding of security fundamentals, particularly around identity, authentication, and access control. He was also dependable in communicating progress, documenting key steps, and responding to feedback throughout the implementation.

Beyond the technical delivery, Ayman showed professionalism and a positive attitude in day-to-day collaboration. He was quick to learn, and consistently willing to take ownership of tasks assigned to him.

We appreciate Ayman's efforts and the value he brought to the team, and we are confident he will be an asset to any organisation pursuing secure, modern identity and authentication practices.

If you require any additional information, please feel free to contact me.

Yours sincerely

Okhi Oktanio
